

The Memory Wave Review Guide

An independent look at the 12-minute gamma sound session — what it is, what it claims, and what the official page never publishes.

For people who want sharper focus, fewer blank moments and a daily routine short enough to actually keep.

What this is. A digital audio session from Binaural Technologies LLC, sold through ClickBank for **\$39**. You download it once and it is yours to keep. Nothing is swallowed, worn or shipped.

Why people look at it. Twelve minutes is short enough to survive a bad week, and the price is one-time rather than a monthly subscription.

What makes it different. Instead of a pill or a puzzle app, it uses sound frequencies designed to gently encourage Gamma brain activity — the band researchers link to mental clarity, focus and calm thinking.

Not for: anyone looking for a medical treatment, a guaranteed outcome, or a refund promise — none of those are published. Affiliate link — we may earn a commission at no extra cost to you; we are not the creator, owner or seller of The Memory Wave.

Get my 12-minute session — \$39 →

The offer: \$39 one-time · 12-minute session · instant download · yours to keep

No money-back guarantee is published on the official page. The refund terms shown at the merchant's checkout are the binding ones.

Instant download · Works on any device · No subscription

Are you suffering from this?

- You walk into a room and forget why you went in.
- Names disappear the second after someone says them.
- You reread the same paragraph three times and still miss it.
- Afternoon fog rolls in and nothing sharp gets done after 3pm.
- You keep losing keys, cards, the thread of a conversation.
- Meetings and appointments blur unless you write everything down.
- You have tried supplements and brain-training apps and quietly stopped.
- You want something small enough that you would actually keep doing it.
- You would rather not say out loud that it worries you.

If several of those landed, The Memory Wave is marketed as a product that may help you feel more focused, more alert and more connected. **Marketed as** — not proven to. That distinction runs through this entire guide.

Who this guide is for. Adults who want a short, non-invasive daily routine at home and who prefer a one-time digital purchase over a monthly subscription. It is not for anyone looking for a medical treatment.

Where the day slips

A typical 24 hours, as readers describe it. Illustrative, not a diagnosis.

7am

Name gone the second after you hear it

11am

Reread the same paragraph three times

3pm

Fog rolls in and nothing sharp gets done

6pm

Walk into a room, forget why

9pm

Lose the thread of a conversation

Late

Worry you would rather not say out loud

What is The Memory Wave?

A digital audio product — specifically a 12-minute sound session you download and play. It is created by Binaural Technologies LLC and sold through ClickBank, which acts as the retailer.

There is no capsule, no wearable, no app subscription and no delivery. The official page states delivery is instant, the session works on any device, and your copy is yours to keep forever.

What \$39 actually buys

One 12-minute audio session
digital download, yours to keep

Instant delivery
plays on phone, tablet or laptop

One-time \$39 price
set by the merchant, can change

No guarantee published
check terms at checkout first

Only details published on the official page are shown. Anything missing is marked as not published.

Only details published on the official page appear above. Where something is not published — a guarantee, for instance — this guide says so plainly rather than filling the gap.

At a glance	What the official page states
Product type	Digital audio session — a single 12-minute track you download.
Who sells it	Binaural Technologies LLC, with ClickBank acting as the retailer.
Price	\$39, one-time, as stated on the official page.
Delivery	Instant download. Nothing ships and nothing renews.
Ownership	Your copy is yours to keep forever.

How it works, according to the official page

Your brain produces electrical rhythms at different speeds. Gamma is the fastest everyday band, and researchers associate it with mental clarity, focus and calm thinking.

The official page says the session uses non-invasive sound frequencies designed to gently encourage Gamma brain activity, and that it was created by a team of neuroscientists. The official website also references scientific research relating to gamma brainwave activity.

Where gamma sits

Brainwave bands, slowest to fastest (Hz)

The Memory Wave session is designed to gently encourage gamma activity. Educational illustration — not a medical claim.

Our honest read. Gamma research is real and ongoing, but general research into a frequency band is not the same as evidence that this particular recording changes anything for you. Treat it as a relaxation-style routine with an interesting rationale — not as a treatment for any condition.

The claim chain	What is actually published
The stated mechanism	Non-invasive sound frequencies intended to gently encourage gamma activity.
Who states it	The official product page, which credits a team of neuroscientists.
What is referenced	Gamma brainwave research in general terms.

What is not referenced	Any trial, study or measurement of this specific recording.
------------------------	---

What to look for — ingredients: what is inside the 12 minutes

There is nothing to swallow here, so the “ingredient list” is the make-up of the audio file itself. This is everything the official page publishes about what you receive.

Inside the 12 minutes

There are no capsules or extracts here — the "ingredients" are audio components.

Sound frequencies
non-invasive tones aimed at the gamma band

One 12-minute track
a single session, played once a day

Digital file
downloaded, kept forever, no subscription

Not listed anywhere on the official page: exact frequencies, track length breakdown, or file format. We do not guess at those, so they stay marked "not published".

Component	What the official page says about it
Sound frequencies	Non-invasive tones aimed at the gamma band. Exact frequencies are not published.
One 12-minute track	A single session, played once a day. No levels, courses or unlocks.
A digital file	Downloaded and kept. No subscription and no re-order.
Nothing ingested	No capsule, powder or extract, so no interaction with medication.

Not listed anywhere on the official page: the exact frequencies used, a breakdown of the track, or the file format. This guide leaves those marked “not published” rather than guessing at them.

The problem it targets, and the benefits claimed

The main pain point: everyday forgetfulness and mental fog — the blank moments, the lost names, the afternoon slump — and the quiet worry that comes with them.

The desired outcome: feeling clear-headed and present again, with a routine that takes minutes rather than becoming another chore.

Feature	The benefit claimed for you
12-minute session	Short enough that the habit survives a busy or bad week — the most common reason routines fail.
Sound frequencies encouraging gamma activity	Nothing is ingested, so there is no interaction with supplements or medication.
Digital download	Available tonight. Nothing to wait for, nothing to re-order, nothing arriving in the post.
Works on any device	Phone, tablet or laptop with ordinary headphones — no special hardware to buy.
Yours to keep forever	A one-time cost that does not grow the longer you use it.
Created by a team of neuroscientists	Stated on the official page as the product's origin — presented as background, not as proof of results.

The four claims, verbatim

Quoted from the official product page. Marketing claims, not proven outcomes.

1 Simple 12-minute routine

short enough to repeat daily

2 Based on brainwave research

gamma-band literature, cited generally

3 Used at home

headphones, any device, no clinic

4 May feel focused and alert

"may" is the vendor's word, and ours

These are the manufacturer's marketing claims, quoted from the official page. They are not outcomes anyone can promise you, and individual experience varies. Nothing here is medical advice.

Instant download · Works on any device · No subscription

How to use it, and what to expect

The 12-minute daily routine

Usage steps summarised from the official product page. Individual experience varies.

Practical notes

- Use headphones — the effect of any stereo sound session depends on both ears.
- Pick a fixed slot (after breakfast, before bed) so the habit anchors to something.

- Do not multitask through it, and never listen while driving or operating machinery.
- The website does not publish a results timeline, so treat anyone promising one with caution.

A timeline for results is not clearly shown on the official website. This guide will not invent one.

When	What is reasonable to expect
Night one	You download the file and play it once. Nothing measurable should be expected yet.
Week one	The only honest goal is consistency — did the 12 minutes actually happen?
Week two	Enough of a run to judge whether the routine fits your day at all.
After that	Your own call. No results timeline is published, so nobody can promise you one.

Review: the proof, and what is missing

An honest review has to include the gaps. At the time this guide was written, the following were not published on the official page — so nothing in this guide quotes or implies them.

Looked for	What we found
Customer testimonials	Not clearly shown on the official website.
Star ratings or review counts	Not clearly shown on the official website.
Money-back guarantee or refund window	Not clearly shown on the official website — read the terms on the merchant checkout page.
Free trial or demo	Not clearly shown on the official website.
Bonuses	Not clearly shown on the official website.

Trial of this specific recording	Gamma research is referenced generally; no trial of this product is shown.
----------------------------------	--

Published vs. not published

Stated on the official page

- \$39 one-time price
- 12-minute daily session
- Digital, instant, keep forever
- Gamma-wave rationale

Not published anywhere

- Money-back guarantee
- Named customer reviews
- Star rating
- Trial of this recording

ClickBank operates its own retailer-level policies for products sold on its platform. The terms displayed at checkout are the binding ones — not this page. ClickBank's published consumer terms and return policy (clickbank.com/legal/consumer-terms) apply to every purchase made through the platform, separately from anything the seller states on the sales page.

Pricing, and why anyone chooses this

The single strongest argument is friction. It is one 12-minute audio file you already know how to use, bought once, with nothing to swallow, wear or re-order.

- Twelve minutes is short enough that the habit survives a bad week.
- One-time \$39 — no subscription quietly renewing in the background.
- Nothing ingested, so no interaction with supplements or medication.
- Instant download: you can try it tonight instead of waiting for post.
- Yours to keep, so the cost does not scale with how long you use it.

The usual way vs. this way

The usual way

Pills and powders every month
Long courses you never finish
Puzzle apps that feel like homework
Ongoing cost, unclear routine

This way

One 12-minute audio session
Nothing to swallow, nothing to wear
Done at home, eyes closed
One-time \$39, yours to keep

A format comparison only. No claim is made that this works better than any other approach.

Item	What the official page states
Price	\$39 — stated on the official page as “Today Just For \$39”.
What you get	The 12-minute audio session, delivered digitally, yours to keep forever.
Delivery	Instant download, usable on any device. Nothing ships.
Bonuses	Not clearly shown on the official website.
Guarantee / refund	Not clearly shown on the official website — check merchant checkout terms.
Retailer	ClickBank, on behalf of Binaural Technologies LLC.

\$39 one-time — about 11¢ a day if you use it daily for a year.

Not sure? Take the 30-second check first.

Get my 12-minute session — \$39 →

Instant download · Works on any device · No subscription

The 30-sec check: find out which of the 3 listener types you are

Three yes/no questions decide whether this suits your week — or whether the free guide is the better stop.

Reading time: 90 seconds

- Can you listen with headphones somewhere quiet once a day?
- Do you have 12 uninterrupted minutes most days?
- Are you comfortable buying when no money-back guarantee is published?

If that is you	What to do next
Type 1 — Ready to try it	You have the quiet time, the headphones, and you accept that no guarantee is published. Next step: open the official page, read the checkout terms, and start tonight rather than “soon” — the routine only counts once it is daily.
Type 2 — Borderline	One thing does not line up, and it is usually the time or the missing guarantee. Next step: read the free guide first, then check the merchant's refund terms at checkout before you decide anything.
Type 3 — Not right now	Without the daily 12 minutes, or comfort with an unpublished guarantee, this is not your product today. Next step: keep your money. Take the free guide, and come back only if a quiet daily slot appears.

Three questions, one honest answer

Three yes answers means it is worth a look. One no is a good reason to keep your \$39.

Whatever your answers say, the full illustrated guide is free — no purchase needed, no card involved.

FAQ, cautions and the verdict

What is it? A 12-minute digital audio session from Binaural Technologies LLC, sold through ClickBank and delivered instantly as a download.

Who is it for? Adults who want a short, non-invasive daily routine at home for focus and clarity, and who are fine using headphones.

How does it work? The official page says it uses non-invasive sound frequencies designed to gently encourage Gamma brain activity.

How much is it? \$39, one-time. Pricing is set by the merchant and can change without notice — confirm at checkout.

Is there a guarantee, refund or free trial? Not clearly shown on the official website. Read the refund terms displayed at checkout before paying.

How do I use it? Play the 12-minute session once a day with headphones in a quiet spot. Never while driving.

Who should be careful? This is a wellness audio product, not a medical device and not a treatment. If you have epilepsy or any seizure history, a hearing condition or tinnitus, or you are being treated for a cognitive or neurological condition, speak to a qualified professional first. If memory changes are worrying you or your family, see a doctor — an audio track is not a substitute for a proper assessment.

Good fit / poor fit

Likely a good fit

- You want a short daily wind-down
- You are fine with headphones
- You prefer a one-time digital buy
- You keep expectations realistic

Probably not for you

- You expect a medical treatment
- You have epilepsy or seizure history
- You need a published guarantee
- You want physical, shipped goods

Simple summary. The Memory Wave is for people bothered by everyday forgetfulness and mental fog. It is a \$39 digital audio session that claims to support focus, alertness and clarity through gamma-encouraging sound. Its strongest point is how little it asks of you; its weakest is how little the official page publishes about guarantees and results.

One more caution. If you use hearing aids, or sound sensitivity is an issue for you, start at a low volume. Nothing in this guide is a substitute for advice from a qualified professional who knows your history.

What the \$39 is made of

What the \$39 covers

\$39

one-time, on the official page

Sold via ClickBank on behalf of
Binaural Technologies LLC

Price is set by the merchant and can change

Included · the 12-minute audio session

Included · instant download, kept forever

Not published · guarantee, bonuses, refund

Waiting costs you the habit, not the price: the routine only pays back once it is daily, so a week of putting it off is a week that never counts.

Not sure? Take the 30-second check first.

Before you buy — checklist

Check these before you buy

- ☒ Confirm today's price on the merchant checkout page
- ☒ Read the refund terms shown at checkout before paying
- ☒ Make sure a digital download suits you — nothing ships
- ☒ Ask your doctor first if you have any hearing or seizure condition
- ☐ Decide you can actually keep a 12-minute daily habit

Independent buyer checklist. Educational only — not medical, financial or legal advice.

Before paying	What to check
Today's price	Confirm it at the merchant's checkout — the merchant can change it.
Refund terms	Read what is displayed at checkout. Nothing is published on the sales page.

Format	A digital download. Make sure that suits you, because nothing ships.
Health check	Ask your doctor first about any hearing or seizure condition.
Your honest answer	Can you keep a 12-minute daily habit? If not, keep your money.

What to do next — three steps

- Read the checkout terms on the official page — especially refunds — before you pay anything.
- Block a fixed 12-minute slot in your day and put the track there, headphones ready.
- Give it two unbroken weeks, then judge it honestly. If nothing changed, stop.
